

Technical Data Sheet

905 Water Base PreClean

905 is a water based cleaner for all acrylic, urethane, previously painted, primed or bare metal surfaces. Excellent cleaner for primed plastic and rubber parts. Works fast to remove silicones, wax, grease and dirt. 905 is VOC compliant for all regulated areas.

Features:

- Removes all grease, wax and other petroleum based contaminants and loose dirt
- VOC compliant for all US regulated areas
- Leaves no residue when properly used
- Excellent price point compared to major brands

Directions:

1. The following steps should be done prior to sanding or grinding to avoid forcing contaminants into the surface being prepared. The following steps should be repeated before each priming steps or painting.
2. Apply directly to cool surface to be cleaned. Apply with cloth or spray applicator.
3. Apply a wet film and allow to stand on surface before drying thoroughly. Do not allow 905 to evaporate on the surface. If so, reapply
4. After allowing to stand wet for several seconds, dry thoroughly with a clean dry cloth while product is still wet.
